

RE:Wireless telephones being hearing aid compaible. Being hearing impaired using a hearing aid has been a major problem in trying to use a cell phone. Reception is not loud enough and feedback from the aid exists when trying to make or receive calls. Cell phones are so necessary in the job force now and makes those of us with hearing losses at a disadvantage on our jobs. The exemption that digital wireless telephones now have should be removed. PLEASE CONFIRM RECEIPT OF THIS E-MAIL.
